Subject: Social Security Information

Dear Sir, Madam

Please read the following information, I went to the SS web site to access my information. But my password is no longer excepted, I then requested a new temporary pass word be sent to me. Then I called the 1-800-772-1213 phone # and spoke with a SS representative. Who I told my problem to, she said unfortunately since I requested a new password she could no longer check on why my current password will not work.

I have contacted my local post office lost or stolen mail 2 separate times, and most recently I went to my local police dept. concerning the lost or stolen mail specifically credit card. Since living at my present address I have had lost or stolen credit cards. And yesterday I received mail addressed to a [redacted] at my address. I know of know one by that name. Since complaining this most recent time I have been receiving all my mail for the past two days. I really feel before that time I was not receiving all my mail.

Since I have taken steps to protect my credit cards and Identity this year, my concern now is my social security and my pass word not working

You may contact me at my home address by mail or my phone # or by e-mail [redacted] phone # and address are available by public records.

Thank you,
[redacted]
